S. Stalla-Bourdillon, J. Phillips, M.D. Ryan

Privacy vs. Security

Series: SpringerBriefs in Cybersecurity

- Helps to ease the dialogue between lawyers and computer scientists via an interdisciplinary approach
- Incorporates a systematic approach to clarify many of the misconceptions in the field
- Sheds light upon the relativity of the solutions adopted at national level and the consensus reached at the international level

Securing privacy in the current environment is one of the great challenges of today's democracies. *Privacy vs. Security* explores the issues of privacy and security and their complicated interplay, from a legal and a technical point of view. Sophie Stalla-Bourdillon provides a thorough account of the legal underpinnings of the European approach to privacy and examines their implementation through privacy, data protection and data retention laws. Joshua Phillips and Mark D. Ryan focus on the technological aspects of privacy, in particular, on today's attacks on privacy by the simple use of today's technology, like web services and e-payment technologies and by State-level surveillance activities.
